Rugged, reliable and ready for work

The RuggedJet 4" Series of mobile thermal printers

PRINT   WIRELESS   BLUETOOTH

brother.co.uk/mobile-printers/ruggedjet

Wireless mobile thermal printing

Empower your workforce to print labels and receipts at any location

RJ-4230B
RJ-4250WB

Key features:

- Compatible with Windows®
- Ready to integrate with iOS® and Android apps
- Portable robust design
- Mobile Deploy - maintain and update the entire fleet of Brother mobile printers simultaneously with a click of a button
- LCD display
- Wide range of connectivity options.

Retail

Increase efficiency for retailers with lightweight, durable and easy to use mobile printers. Provide employees with a simple and accurate labelling and receipt solution, perfect for pricing, promotions and queue-busting to increase customer satisfaction.

Transport and logistics

Agents need to be equipped with a seamless solution to help streamline their workflow and minimise downtime. Mobility and integration are key, so agents have access to systems providing pricing, invoicing, inventory control, and customer information. Making it easier to produce invoices on-site.

Field service

Whether there's a need for receipts or smaller format labels, without a mobile print solution, handwritten documents are time consuming and prone to error. That's why most businesses are empowering their workforce with mobile technology, allowing them to complete tasks on the move, professionally and on schedule.

Public service

Increase operational efficiency by allowing law enforcement officers and emergency staff to document and report incidents more accurately and efficiently, at the point of interaction. With their rugged design, fast print speed and reliable operation, the range offers a competitive combination of performance and features.

Warehousing

Efficient warehousing operations and worker productivity are critical to the success of many companies. Using wireless connectivity, the RJ mobile thermal printer range provides the ability to print barcode labels on-demand, at the point of application. This saves time and reduces potential errors caused by mislabelling.

General

Connectivity
USB 2.0 (Full Speed) (mini-B)

Print speed
Maximum 5ips(127mm/sec)*

Print length
Maximum print length 3000mm

Maximum print wide
104mm

Number of labels per battery charge
Li-ion battery: approx. 10,000 labels
(continuous print)*

Carton contents
Belt clip
Adjuster guide locks
Documentation

Built-in features

Printing speed
Maximum 5ips (127mm/sec*)

Power
UK mains

Print resolution
203dpi

Technology
Direct thermal

Number of labels per battery charge
Li-ion battery: approx. 10,000 labels
(continuous print)*
